PROFILE

I'm a Python developer from Ukraine with more than 2 years of commercial experience, mainly focusing on backend development. My goal is to excel in backend development, and I'm determined to put in the effort needed to achieve that level of proficiency.

WORK EXPERIENCE

PYTHON BACKEND DEVELOPER

DevelopsToday

January 2023 — March 2024

- Used FastAPI and DRF to create important features for projects like e-commerce and education websites.
- Updated and improved software based on specific design plans.
- Delivered better user experiences and smoother processes through customized software solutions.

DJANGO DEVELOPER

Parsalytics

October 2022 — December 2023

- Contributed to the development of a scalable real estate analytics web-system.
- Developed thorough testing procedures, raising coverage to 90%, which cut down on bugs and improved system reliability.
- Incorporated an external parsing API to assist in building a reliable real estate analytics system.
